

WORT ANALYSIS FAQ

WHY DO WORT ANALYSIS?

It represents the sum of several key CRITICAL DECISION MAKING STEPS:

- ∞Milling and grain bill formulation
- ∞Mash-in and water treatment
- ∞Lautering
- ∞Hop additions
- ∞Total boil profile, (hot and cold break)

It excludes yeast pitching and fermentation

If sterility is maintained the sample is quite stable (kept cold, dark)

Easy to prepare for analysis (no degassing needed)

Samples can be mailed via the
United States Postal Service (USPS)

minimize shipping costs

WHY WORT ANALYSIS WITH ANALYSIS LABORATORY?

Calibrate your hydrometer to an Anton Paar DMA 5000 density meter.

ASBC approved methods ensure industry-standard information.

Complete sample processing from empty bottles to customized electronic reporting.

Analysis Laboratory can help you maximize the return from your process data.
You won't improve what you don't measure. Let's look at the numbers, together.

Scott Bruslind, Laboratory Manager Linda Bruslind, Ph.D., Laboratory Director
